LGS Seeks Funding for Care Coordination Role

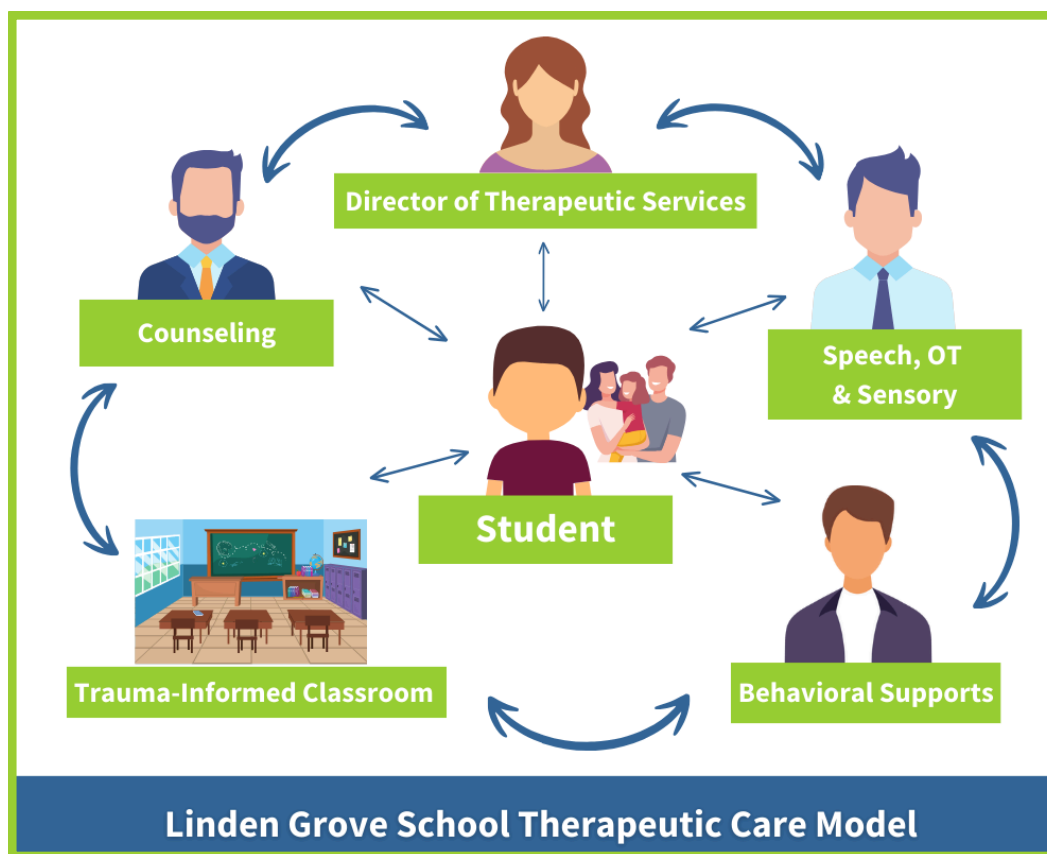

Linden Grove School has developed a new role, Director of Therapeutic Services, to coordinate and streamline care provided to our students. LGS offers support services including counseling, behavioral support, occupational and speech therapy, interoception, and more. With the expansion of more specialized therapies, ensuring seamless coordination of those services has become essential so that students receive the greatest benefit.

Mrs. Tennyson recalls a student who did not respond to outside "traditional" therapies. He masked his feelings during the school day and fought coming to school. He began receiving support in interoceptive awareness, trauma-informed classroom strategies, and occupational therapy separately, but until those plans were integrated cohesively, he still struggled. "Now, with the coordination of these therapies, his voice has been amplified. He shares his feelings and can talk through his preferences, concerns, and anxieties. And...he attends school consistently!" Mrs. Tennyson said.

This level of care coordination does not exist in schools, and we are confident it will significantly impact on our students and their families.

LGS will seek funding for this position through our passionate donors and foundations that support this work.

To donate or discuss funding strategies, please contact **Melanie Crowe** at mcrowe@lindengroveschool.org.
